THE WOOD COATINGS

KATILAC COATINGS INC.

EXTERIOR WATERBORNE SYSTEMS

ITALIAN POLYURETHANE TECHNOLOGY

EXTERIOR WATERBORNE SYSTEMS

IMPREGNATORS

6IMW9000 / 6IMW9400 Waterbased Impregnators

These impregnators are pre-treating agents used prior to waterbased exterior topcoats to provide protection for outdoor furniture or exterior applications.

- 6IMW9000 / 6IMW9400 Premium WB Impregnators for Coniferous / Broadleaf woods
- 6IMW4500 Neutral WB Impregnators for Coniferous / Broadleaf woods

SEALERS & PRIMERS

6FWE900 Waterbased Clear Sealer for Exterior HQ

A monocomponent basecoat for exterior application. Good elasticity, clarity and vertical hang.

Must be used with WB Impregnator

- 40.2% weight solids; 40.0% volume solids
- 12000 mPa-s viscosity
- 2-4 hrs to sand

6FWP630 White Waterbased Exterior Primer

A monocomponent white waterbased primer with excellent build, good resistance to sinking, minimum swelling of the grain and good stain blocking properties.

- 52% weight solids; 37% volume solids
- 11000 mPa-s viscosity
- 2-4 hrs to sand; 8-12 hrs to stack

TOPCOATS

6OWE950G Honey Exterior Waterborne Topcoat

A honey coloured waterborne exterior topcoat that has excellent UV resistance. It has excellent resistance to weather conditions. The film allows the wood to breathe.

- 37% weight solids; 35% volume solids
- 30000 mPa-s viscosity
- 1 hr dry to touch; 16 hrs stackable
- 5,30,50 sheens
- 10% reduction with water
- also 6OWE510G5SO4 Dead Flat Clear Ext Waterborne topcoat available

6OWP230 White Waterbased Exterior Topcoat

A waterbased white thixotropic topcoat that is fast drying, has good blocking resistance, good vertical hang and good non-yellowing resistance. Must be used over impregnating agent.

- 47% weight solids; 37% volume solids
- 14000 mPa-s viscosity
- 180 min dry to touch, 24 hrs to stack
- 10% reduction with water
- matte finish

ITALIAN POLYURETHANE TECHNOLOGY

Sirca is a global leader in the development and manufacturing of the highest quality industrial wood coatings. The Sirca line is a broad assortment of industry leading technologies including clear & pigmented polyurethanes, acrylic polyurethanes, waterborne & UV coatings, interior & exterior systems and stains.

Katilac Coatings Inc. (KCI), a Canadian manufacturer of conventional acid cured wood coatings including pre- and post-catalyzed lacquers, conversion varnishes, waterborne finishes and colour systems. KCI is Sirca's partner to bring their Italian finishes to the Canadian market.
