

KATILAC COATINGS INC.

QUICKSEAL™

Post-Catalyzed Vinyl Modified Sealer

A high build sealer that exhibits very fast dry and is as smooth as a topcoat

QUICKSEAL™

Post-Catalyzed Vinyl Modified Sealer

VS4 QUICKSEAL™ Post-Catalyzed Vinyl Modified Sealer is a two component, solvent borne, alkyd / amino / vinyl resin based clear sealer. It is high build, water white, yellowing resistant vinyl sealer that dries very quickly, sands and powders easily, and exhibits excellent hold out and adhesion properties. QUICKSEAL™ is a high solids sealer which gives it excellent filling properties and makes it ideal for rustic applications and open pore woods. Additionally, the vinyl resins in VS4 QUICKSEAL™ give this product better moisture resistance which is desirable for kitchen cabinet applications.

VS4 QUICKSEAL™ is engineered to compliment all of KCI's clear post-catalyzed lacquers and conversion varnishes.

Features

- 34% weight solids; 25% volume solids
- 10% catalyzation by volume
- Ready to spray after catalyzation
- 8-10 hour pot-life
- Ultra-low formaldehyde
- Formulated with the same quality resins used in KCI's post-catalyzed topcoats

Also available:

KATILAC™

Vinyl Sealer

EK8 KATILAC Vinyl Sealer is a dual cure vinyl sealer for use under all KCI clear solvent-based topcoats. It has excellent clarity, is very fast to dry and easy to sand.

Features

- 25% weight solids; 16% volume solids
- Ultra-low formaldehyde
- Water-white; yellowing resistant
- Can be used as a pre-catalyzed sealer or can be catalyzed 5% for use under KCI post-catalyzed lacquers and conversion varnishes

KATILAC™

Pre-Catalyzed Sealer

EK6 KATILAC Pre-Catalyzed Sealer is a versatile, water white sealer designed for use under KCI's pre-catalyzed lacquers. It is quick to dry and exhibits excellent sanding properties.

Features

- 25% weight solids; 19% volume solids
- Ultra-low formaldehyde
- Water-white; yellowing resistant
- Can be used under all KCI's pre-catalyzed lacquers
