

KCI's GREENCURE™ Formaldehyde Free Products

KCI's GREENCURE™ is a unique line of Canadian engineered and manufactured formaldehyde-free solvent borne products that do not contain or liberate formaldehyde during the drying or curing process. GREENCURE™ products meet or exceed North American environmental standards including:

- LEED, BIFMA, and IAQ indoor standards for formaldehyde free designation

GREENCURE™ products do not contain any of the following prohibited or suspect chemicals outlined within these environmental standards:

- Formaldehyde or formaldehyde donors
- Isocyanates
- Heavy metals
- Alkyl phenol ethoxylates (APE's)
- Triphenyltins (TPT) or Tributyltins (TBT)

GREENCURE™ products feature outstanding application and performance characteristics. All products in this line meet or exceed testing requirements found in the following industry standards:

- KCMA (Kitchen Cabinet Manufacturers Association) ANSI/KCMA A161.1.2000
- AWI (Architectural Woodworking Institute) TR-3/OP-3
- NAAWS (North American Architectural Woodwork Standards)
